EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Thomas Saur on 7/1/04.

The application has been amended as follows:

In the claim: Cancel claims 31-43.

3. The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 7, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which at least include detecting optical invisible radiation using two or more ionizing radiation detectors for converting the ionizing radiation into signals, processing the signals to obtain stereoscopic data and displaying the stereoscopic data directly to a user's eyes in the form of optically visible radiation superimposed on a view of the environment so that a user can obtain a stereoscopic 3D view of the radiation utilizing nature human stereo imaging as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zhang (US 6,476,391) discloses an infrared imaging system for advanced rescue vision system.
